SUMMARY

"The advance of technology is based on making it fit in so that you don't really even notice it, so it's part of everyday life." This quote by Bill Gates is what started it all. I've always admired how technology has made everything accessible by the touch of a finger. I always strive to make things simple but efficient which are the core basis of technology. My people skills have made me relatable putting me in the forefront of understanding people's needs. As a newly graduated professional with software development project experience, I am focused, results-driven and knowledgeable in multiple computer languages. Seeking an opportunity to enhance various software packages.

EXPERIENCE

09/2023 - 12/2023
